

EE BRIGHT BOX 2

SUPERFAST MADE SUPEREASY
WITH PLUG & PLAY FIBRE

The Bright Box 2 provides Fibre Broadband without the hassle of having an engineer come to set it up. Plus, our clever new router will enable you to get faster Wi-Fi in more parts of your home – the first router in the UK Broadband market with the latest Wireless AC technology. It really couldn't be easier to go superfast.

JUST LET US KNOW:

PLUG AND PLAY FIBRE – NO HASSLE

Currently, if you wanted Fibre Broadband, you have to wait at home for an engineer to come and set it up for you. We're removing that hassle with our new Bright Box 2 router.

It's easy to set up yourself – each router is personalised, so it is ready for you straight away. Just plug it into your phone socket and off you go – superfast up to 76Mb/s. We've even made the box small enough to fit through your door so it can be delivered straight to your home, even if you are out.

And best of all, the Bright Box 2 router (worth £175) will be free to new and upgrading EE Fibre customers.

NEW SMARTPHONE-OPTIMISED ROUTER

Another UK first from EE.

We know how important good Wi-Fi is for a modern household – you need the best connections for your phone, tablets, laptops, TV and more. Our Bright Box 2 router uses the new standard of Wi-Fi, called Wireless AC. Better and more powerful than the old standard, it's the same Wi-Fi standard that the latest mobile devices use.

In a nutshell, it will enable you to pick up faster Wi-Fi in more parts of your home so if you're using the latest devices such as the Samsung Galaxy S4 or HTC One, your Wi-Fi will keep its speed even when you move away from the router.

Even if your devices aren't the latest with Wireless AC standard, you can still enjoy improved Wi-Fi. Bright Box 2 delivers Wi-Fi on two different network bands at the same time, ensuring you'll get less interference. You can select the strongest network band to join from your device so you always get the best possible connection.

The EE Bright Box 2 will be available free of charge to new and upgrading Fibre customers later this summer.
